WORK EXPERIENCE

Full Stack Software Engineer

Raytheon - Orlando, FL - octombrie 2015 până la decembrie 2016

- Updated legacy applications heavily developed in C# and PHP.
- Programmed new front end applications using knowledge of Angular.JS and Kendo UI technologies.

Software Engineer Intern

The Walt Disney Company - Orlando, FL - iunie 2014 până la mai 2015

Worked in a fast paced collaborative environment to create technology solutions for various internal stakeholders.

- Created iOS applications in Objective - C under an enterprise environment, maintained with Github online repositories.
- Used standard methodologies for the research and development of new technologies.

Assembled database procedures by applying SQL cross table referencing to retrieve information for clients.

- Managed over 30 audits to adequately support the Labor Administration and Time Team.
- Co-authored system and procedure documentation to ensure successful knowledge transfer.
- Lead the design direction effort of a new internal processing website, improving user experience and mobile readability.
- Processed 90+ audits to correct system defects securing correct payment for approx. 60,000 Cast members.

Student Application Developer/Researcher

Mississippi State University - iunie 2010 până la mai 2014

Developed iOS applications in Objective-C using to pull data from databases using PHP and SQL.

- Generated computational scripts for biological data in Perl programming.
- Assisted the staff with phases of project cycles and with any technical problems or needs.

Cooperative Education Student

CJC Technologies - Franklin, TN - ianuarie 2013 până la decembrie 2013

- Formatted web pages using C# to access banking databases and jQuery widgets for more streamlined UI.
- Compiled banking reports using a combination of XSLT to gather correct XML elements.
- Improved the usability and navigation of the company's main website using HTML5/CSS and JavaScript.
- Researched and implemented an Agile programming philosophy to manage the development process using JIRA.
