WORK EXPERIENCE

iOS Developer

JiGuang TECHNOLOGY - Shenzhen - 2015 to 2016

JiGuang is China's leading mobile big data platform and mobile application cloud service provider which served over 400,000 mobile applications, monthly unique active device over 600 million, or over 90% mobile devices in China.

iOS Developer

I was in charge of IM SDK client side. My main job was architecture design, public API design, code refactoring, database design and optimize, write Unit Test and execute TDD, and mentor junior developers. When I started to take over IM SDK, it was fragile, and in a bad reputation. After 1 year evolvement, it became one of the most popular IM SDK in China.

Projects:

Technologies: OC, SQLite, Git, Shell Script, TDD, Jenkins, Continuous integration, Unit test
