Georald Camposano

Full Stack Developer - PGI Auto

Everett, WA - Email me on Indeed: indeed.com/r/Georald-Camposano/976bc831517ed37b

• 8 years of experience in Web Development (using PHP with the Yii Framework and MySQL)
• Have handled projects that required different technologies such as Ajax, DHTML, and flash-based websites.
• Always seeking to improve my current skill through researching of newer web technologies.
• Ability to work well in both team and individual environments.

WORK EXPERIENCE

Full Stack Developer

PGI Auto - 2013 până la Prezent

Currently employed as a Full Stack Developer with a focus on PHP. Developed solutions and built systems that would benefit our clients in the auto industry. Also re-factored and re-wrote several in-house systems to improve overall output, reliability and/or meet new requirements. Refined the company's classified ads vehicle posting product, turning it from a manual tool that required manpower for posting, to an automated, scheduled process that could be managed by our clients.

Currently working on building internal APIs to allow easy interoperability between our in-house tools.

Web Developer

Zeniark LLC, a Virginia - 2008 până la 2013

Worked as a web developer. Created websites and other online solutions for clients. Such projects include in-house work (such as a login/logout system for our employees to track work hours), a US government related project to train truck drivers online, and a social networking site designed for families to connect with one another. Also helped build standards for our development process (eg. enforcing the use of an online SVN solution for projects and recommending the use of a PHP framework to aid in development).

EDUCATION

B.S. in Computer Science

Angeles University Foundation
2004 până la 2008

SKILLS

PHP, MySQL, HTML, Javascript
