Anthony Taylor
Senior Software Engineer - Creative Zing

Sanford, FL - Email me on Indeed: indeed.com/r/Anthony-Taylor/e22ce7328d9108e0

My objective is to write n-tier applications using .Net technologies with most rdbms', ASP.Net applications, web services, Windows services and etc utilizing my programming and accounting skills.

I have experience with .Net Framework 1.1, 2.0, 2.5, 3.0, 3.5, 4.0, 4.5, MVC, Angular, MS Access, SQL Server, Oracle, Sybase, MySQL, VBA, VB 6.0, VB.Net, C#, ASP.Net, C/C++, Java, ASP, COM, HTML, Bootstrap, CSS, JavaScript, AJAX, IIS, NT, SOAP, XML (DOM and .Net), WPF, WCF, Web Services, e-commerce, credit card processing, Crystal Reports, Spreadsheets and various other software applications. Additionally, I have experience using virtually all Microsoft Office technologies.
Authorized to work in the US for any employer

WORK EXPERIENCE

Senior Software Engineer
Creative Zing   -   Orlando, FL - February 2016 to Present

I build Web Applications (Web Forms), WebAPI's, Angular, Bootstrap, MVC Applications,
Create databases, write stored procedures, create reports and perform
Various other related task using Visual Studios 4.5, C#, Java Script,
MVC, SQL Server and various other technologies

Senior Solution Engineer
Deloitte LLP   -   Lake Mary, FL - July 2015 to December 2015

I worked on various projects using Visual Studios 4.5, C#, ASP.Net, MVC, SQL Server and various other Microsoft technologies

Senior Software Engineer
Bonnier Corp - November 2012 to July 2015

Initially I was part of a complete team with two other senior software engineers. Management terminated everyone else and it became my sole responsibility to create or maintain enterprise level applications that are, basically, responsible for collecting and processing advertisement material from major corporations, publishing over 50 magazines and an interface for a major ERP application. I was also tasked with converting the database from Oracle to SQL Server. I used Visual Studios 2015, ASP.Net, C#, JavaScript, WCF, Web Services, Telerik, Lambda expressions, Linq, CSS, AJAX, Oracle 11g, CodeSmith and various other related technologies.

Senior Software Engineer
Universal American Corp   -   Lake Mary, FL - December 2011 to November 2012

I was working to create ASP.Net web applications using Visual Studios 2008, C#, VB.Net, WCF, Web Services, SQL Server 2008, Telerik, JavaScript, JQery, Visual Studio 2010 and other Microsoft technologies.

Senior Software Engineer
Harland Financial Solutions, Inc   -   Lake Mary, FL - May 2010 to December 2011

I was working on a core banking product. This product is sold internationally and is among the highest ranked in its category. I am using Visual Studios 2005, C#, SQL Server 2008, Sybase, stored procedures, cursors, high speed transaction processing on a large n-tier application.

Senior Software Engineer

Darden, Inc - Orlando, FL - December 2009 to April 2010

I worked on a large project to manage the supply-side of the largest casual dining restaurant in the world. I used MVC, Visual Studio 2008, C#, Oracle, AJAX, HTML, CSS, Java Script, LINQ, Lambda Expressions and etc. I am responsible for adding functionality and fixing various problems in various areas.

Teacher Education Inst

Winter Park, FL - March 2008 to June 2009

Senior Software Engineer
I worked designing and creating an online college and a desktop application to support it using Visual Studio 2008 (3.5), ASP.net, VBA, OLEDB, AJAX, ADO.net, WPF, WCF, SQL Server 2008, SOAP, XML (DOM and .Net), Web Services, Crystal Reports, e-commerce, credit card processing and etc. I have also written tools for the import of data from an Access database (OLEDB) into a SQL Server Database. The data was not normalized. I am responsible for gathering requirements, the business design, the technical design, the creation of a normalized SQL Server 2008 Database and writing and debugging the application for this project.

Senior Software Engineer

Toptech Systems, Inc - Longwood, FL - September 2006 to March 2008

Worked on a large n-tier project using .Net Framework 2.0 and 2.5, C#, SQL Server, MySQL, Crystal Reports, ADO.net SOAP, XML (DOM and .Net), UML, OOP and other technologies. I worked primarily on the client side and middle tier. Creating custom components and correcting issues. There are components that are written in VB.Net that I worked on that I worked on as well.

Programmer/Self Employed - Visual Basic/Access

PleasureSoft.net - Orlando, FL - January 2000 to July 2006

• Developed diet and fitness software using C#, VB.Net, VB 6.0, ADO, VBA, OLEDB, Crystal Reports and Access
• Created an e-commerce web site using ASP, ADO, Access, IIS, HTML and etc.
• Developing an integrated n-tier accounting system for auto parts retail using VB .Net, SQL Server 2000, XML (DOM and .Net), Crystal Reports, ADO .Net and Web Services

Senior Software Engineer

Fiserv, Inc - Lake Mary, FL - January 2006 to June 2006

Worked on a large n-tier project using VB.Net, SQL Server, UML, OOP, Crystal Reports, ADO.net and other technologies. I was responsible for the technical design, creating the client, middle tier and the server tier. I was also responsible for unit testing, debugging applications developed by others and developing key components. Also, developed complex reports using cross tabs, sub-reports and multiple formulas in Crystal Reports 9. All of this was done using design patterns developed by Microsoft specifically for this project.

Software Developer

Lonehill Systems - Orlando, FL - July 2005 to December 2005

Lonehill Systems is a VAR for a large ERP application. It was my job to develop custom front ends for this application in the form of desktop applications, web applications or interfaces to various types of devices (RFID scanners, bar-code scanners, hand held devices and etc) using APIs that were exposed by the devices. I used C#, VB.Net, ASP.Net, XML, web services, Crystal Reports, SOAP, Access and etc to accomplish this.
