Cristian Avalos
Fullstack Software Engineer

New York, NY - Email me on Indeed: indeed.com/r/Cristian-Avalos/7050546cc5893bfe

I am a full-stack software engineer with a passion for technology, algorithms and data manipulation. I have extensive experience building and architecting applications using many languages including Javascript, Java, Python , HTML , CSS, C++. I strongly believe in making applications with a beautiful UI and code reusability.

Recently, I have worked with a team to create a AngularJS platform that helps users finds local music events from something as small as your favorite band on your local bar to a huge stadium concert. To obtain the data, I made RESTful calls to the Eventbrite API as well as scrapped some local websites to provide a bigger range of events. Afterwards, with flexibility in mind, I created a PostgreSQL database to store the scraped data after normalizing it to match API results. Finally, I used Git for version control and to communicate with my colleagues.

I am very confident using Javascript and many JS frameworks such as AngularJS, NodeJS, ExpressJS. In addition, I have lots of experience with relational and non relational databases such as mySQL, PostgreSQL, and MongoDB . I have used Git in several of my projects, and obtained data using many modern RESTful APIs.

I am looking to join a company where I can contribute since day one. A company that will help me grow as an engineer, by making an application(s) that will be used by a lot of people.
Authorized to work in the US for any employer

WORK EXPERIENCE

Web Developer
Freelancing - 2013 până la Prezent

Created and collaborated on implementing websites adapting to client's specifications

Math Tutor
Hostos Community College - 2007 până la 2015

HTML & CSS Instructor
Hostos Community College - 2013 până la 2013

EDUCATION

B.S in Computer Engineering
City College of New York - New York, NY
2015

Advance Software Engineering Immersive Program
Telegraph Academy - Berkeley, CA
2015
